

PROGRESS ON THE INTERNATIONAL BUS TERMINAL PROJECT

Synercon Consulting, in collaboration with **KPEC (Khyber Pass Economic Corridor)**, is progressing with the Master Plan and Feasibility Study for the International Bus Terminal to enhance travel between **Afghanistan and Pakistan**.

A recent joint meeting at the KPEC office brought together key officials from **NHA, UPPU, Transport, and KPUMA**. During the session, Team Lead Mr. Nadeem Shaikh presented a SWOT analysis to select the best site for the terminal. Our team proposed three potential sites, each covering over **20 acres**. Additionally, a new site near Takht-a-Baig, District Khyber, was suggested by the **Project Director (KPEC)**, and a follow-up site visit was conducted with the **Assistant Commissioner (AC) of Jamrud**.

COMMITTEE MEMBERS MEETING AT EPA: ACTION PLAN FOR "SMOG ROADMAP IN PESHAWAR

In a recent meeting with the **Environmental Protection Agency (EPA)**, **Synercon Consulting's Director, Dr. Irfan Ahmed Khan, an Environmental Specialist**, presented innovative proposals to address the growing smog issue in Peshawar. Leading the session alongside **Chairperson Miss Fizza Mohsin and Deputy Director Mr. Afsar Khan**, Dr. Irfan emphasized the importance of collaboration between the EPA, TMA, Transport Department, Traffic Police, Local Government, Provincial Department, and other key stakeholders. Key proposals discussed included the installation of **Air Quality Index Devices** throughout Peshawar as a top priority. These proposals also outlined short-term, medium-term, and long-term strategies to reduce pollution, improve energy efficiency, and implement sustainable urban solutions.

At Synercon Consulting, we remain committed to driving positive environmental change and supporting the development of long-term, impactful solutions for a cleaner, healthier future.

DESIGN & SUPERVISION OF 3-STORY PLAZA AT PESHAWAR HIGH COURT BAR ASSOCIATION

Synercon Engineering has successfully completed the design and supervision of the **3-Story Plaza for Shops & Offices at the Peshawar High Court Bar Association**. This project highlights our expertise in architectural design, engineering, and project management. Our team ensures the highest standards of quality and efficiency are maintained throughout the construction process.

RENOVATION & CONSTRUCTION OF 85 HEALTH FACILITIES IN KP

Synercon Engineering, in collaboration with **G3 Consultants**, recently held a key meeting regarding the Design & Supervision for the renovation and construction of **85 Health Facilities** across four districts in Khyber Pakhtunkhwa (KP). The project is funded by the World Bank.

The session was led by **Dr. Ubaid Ullah, Health Planner, and Azmat, Principal Architect**, who provided an in-depth briefing to the KPHCIP team. The focus was on adhering to the infrastructure standards set by the World Bank, ensuring high-quality healthcare facilities that align with global best practices. Key points of the discussion included efficient waste management, environmental sustainability, and the integration of modern healthcare infrastructure to serve the people of KP.
